Answers, and the clue explained

11. Cat A slow blink is a cat's smile. Slow-blink at a cat, and it will often blink back.

12. Dog Every dog's nose print is different, just like your fingerprint.

13. Goldfish Fish have no eyelids; the water keeps their eyes clean and wet.

14. Bunny (a rabbit) A rabbit's teeth never stop growing, so it needs hay to wear them down. The happy jump really is called a binky.

15. Hamster Hamsters have stretchy cheek pouches that reach back to their shoulders.
