

How to draw a candy cane

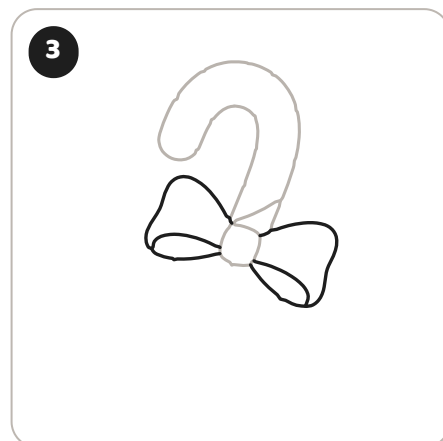

One step at a time: the black lines are new, the gray ones you drew already.

Let's draw a candy cane with a bow! First, the big curvy hook.

Now a knot in the middle, where the ribbon is tied.

Now a big ribbon loop on each side of the knot.

Now two ribbon tails hanging down, with pointy ends.

Now the bottom of the stick, peeking out under the bow.

Now slanted stripes all around the hook at the top.

Last, two stripes on the bottom of the stick. Sweet!

YOUR TURN

My candy cane

Draw it here, then color it in.
