

How to draw a snow globe

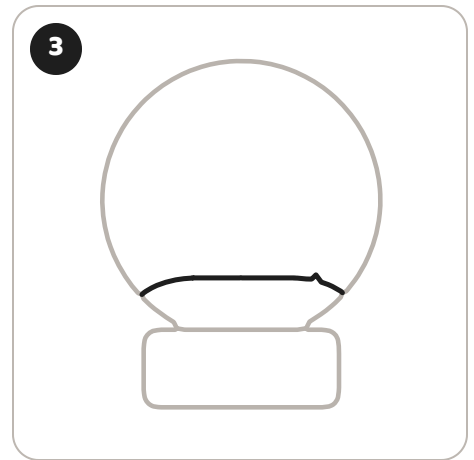

One step at a time: the black lines are new, the gray ones you drew already.

Let's draw a snow globe! First, a big round glass ball.

Now a rounded base underneath, like a little box.

Now a curved snowy hill inside the globe.

Now a little house on the hill: a roof, walls, and a line across.

Last, a pointy tree next to the house. Give it a shake!

YOUR TURN

My snow globe

Draw it here, then color it in.

A large, empty rectangular box with rounded corners, intended for drawing a snow globe.
